About DST, Rajasthan

The Department of Science and Technology (DST), Rajasthan, was established in 1983 with the vision of fostering a scientific temper and leveraging science and technology to improve the socio-economic conditions of the state, particularly in rural and marginalized communities. It serves as a key arm of the state government in promoting innovation, scientific research, and the practical application of technology to address regional challenges.

The department plays a pivotal role in:

- Promoting the application of science and technology for the overall development of Rajasthan.
- Addressing unique regional challenges through innovative and sustainable solutions.
- Enhancing quality of life by implementing projects tailored to the needs of weaker sections and rural areas.
- By executing impactful programs and fostering collaboration between researchers, institutions, and industries, DST Rajasthan continues to be a cornerstone for driving innovation and progress in the state. The department actively supports research initiatives, startups, and skill development programs, contributing to sustainable development and establishing Rajasthan as a hub for scientific innovation.
